Pump Up Possibilities

# Company Mission

During the past 20 Years more than..

**1,000,000** Jilong Watercrafts

**10,000,000** Jilong Pools

**100,000,000** Jilong Air Beds

and **1,000,000,000** items of Jilong Fun Gear

... have been brought to gardens, houses, swimming pools, beaches, lakes and rivers in more than 50 countries around the globe, helping people to relax, to have fun – to simply have a Great Time!

## Jilong – Pump up Possibilities.

# Company Profile

Shanghai Jilong Plastic Products Co., Ltd. is an export orientated manufacturer of plastic leisure products with a considerable experience in R&D, high quality manufacturing and world-wide sales. Every year JILONG products reach customers in more than 50 countries in Europe, North America, Australia and Asia.

JILONG factory is equipped with its own R&D centre, where a highly professional team collaborates with foreign designers to develop new products and packages. Various technical parameters of each new product have been tested and verified by internal professional lab, such as ITS, TUV and SGS.

JILONG offers excellent quality, competitive price, OEM manufacturing, low minimum order quantities, timely delivery, product warranty and after sales service in Europe and North America. Join us in our effort to make life more fun!

## PRODUCTION CAPACITY

Warehouse

Calender Machine for PVC Sheet Production

Flock Workshop

6 - Color Roller Printing Machine

# Material and Technology

Our construction materials and technology that make our paddle boards, boats and kayaks durable and safe to use.

More economical: A single layer of heavy duty PVC is used to form a strong body for boats.

Safer: A 3-layer laminated material of a polyester mesh with a heavy gauge PVC at each side is used to form a strong and super durable wall for boats.

Anti-corrosion: First-grade marine plywood with PU coating offers extreme protection against sunlight, salt water, chemical, and fungal attack, much better than a standard plywood.

Anti-leakage: High frequency welding that creates an unbreakable and extra-tight seam for all inflatable boards, boats and kayaks.

More Solid: A multi-layer material "drop stitch" construction method allows for much higher air pressure than standard PVC material would allow for. Higher air pressure provides a more rigid floor that enhance the performance of paddle boards and boats.

X2  
Jilong has received a patent for the Dual Air Chamber SUP design, which provides users with a higher level of safety: even when one air chamber is deflated or penetrated, Jilong SUPs can still take the user back to land safely.

# Quality Assurance

## Test 1:

Each board has passed a strict 96h tightness test before shipment.

First step:  
semi-48h leak detection

Second step:  
finished-48h leak detection

## Test 2:

Material has past three years of weathering test

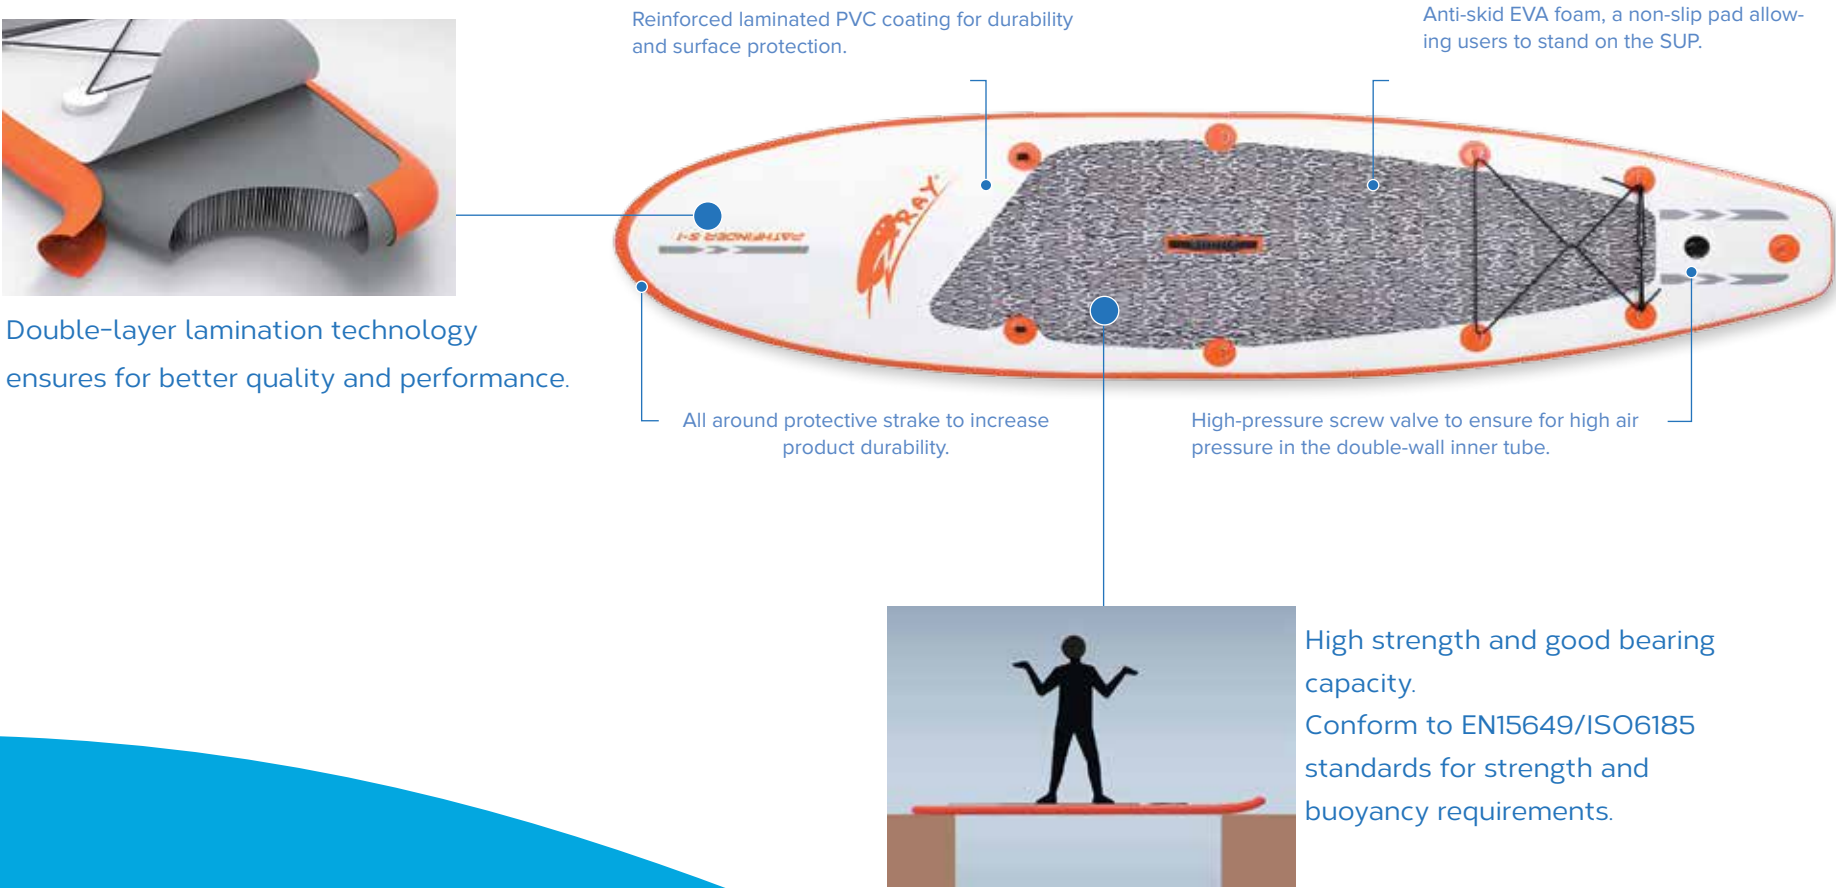

## Test 3:

Each batch of materials needs to pass a physical performance verification test
